O FRIGORÍFICO

NÃO DEVEMOS COLOCAR ALIMENTOS QUENTES OU MORNOS NO FRIGORÍFICO, CASO CONTRÁRIO O FRIGORÍFICO TERÁ DE CONSUMIR MAIS ENERGIA PARA OS ARREFECER EFICAZMENTE. EVITAR A ACUMULAÇÃO DE GELO NO CONGELADOR OU ARCAS FRIGORÍFICAS, PARA MANTER UM MENOR CONSUMO ENERGÉTICO. VERIFICAR AS BORRACHAS DAS PORTAS EVITANDO FUGAS DE TEMPERATURA TAMBÉM É MUITO IMPORTANTE.

EnerKids

EM

ÁGUA QUENTE

AO GASTARMOS MUITA ÁGUA QUENTE, O TERMOACUMULADOR TEM DE TRABALHAR MUITO MAIS PARA AQUECER MAIS QUANTIDADE DE ÁGUA, O QUE FAZ COM QUE GASTE MUITA ENERGIA. AO REDUZIRMOS O TEMPO DO BANHO E AO DESLIGARMOS A ÁGUA ENQUANDO NÃO A ESTAMOS A USAR, AJUDA A POUPAR ENERGIA. E NÃO TE ESQUEÇAS, A ÁGUA É PRECIOSA, NÃO DEVEMOS GASTAR DEMAIS.
